Listing of Claims:

This listing of claims will replace prior versions and listings of claims in the application:

Claims 1-27 (Cancelled)

28. (Currently Amended) A lightweight multilayer heat reflective concrete cure blanket, comprising:

a first flexible structure comprising a first moisture-impervious outer film and a first flexible undulating film in a cross-sectional view heat sealed to the first moisture-impervious outer film forming a plurality of first air-filled insulative pockets;

a second flexible structure comprising a second moisture-impervious outer film and a second flexible undulating film in a cross-sectional view heat sealed to the second moisture-impervious outer film forming a plurality of second air-filled insulative pockets, wherein the second moisture-impervious outer film includes a plurality of heat reflective elements dispersed throughout the second moisture-impervious outer film; and

the first flexible structure heat sealed to the second flexible structure including a plurality of open spaces between the second air-filled insulative pockets and the first air-filled insulative pockets, wherein the open spaces between the first air-filled insulative pockets communicate with the heat reflective elements in the second moisture-impervious outer film to form a flexible heat reflective concrete cure blanket.

29. (Previously Presented) The heat reflective concrete cure blanket of Claim 28, wherein the second moisture-impervious outer film comprises a coating of heat reflective elements applied to the second moisture-impervious outer film.

30. (Previously Presented) The heat reflective concrete cure blanket of Claim 28, wherein the second undulating film includes a plurality of heat reflective elements dispersed throughout the second undulating film.

Serial No. 10/079,192  
 Attorney Docket: 6081-005  
 Customer No. 29,335

31. (Previously Presented) The heat reflective concrete cure blanket of Claim 28, wherein the first moisture-impervious outer film includes a plurality of heat reflective elements dispersed throughout the first moisture-impervious outer film.

32. (Previously Presented) The heat reflective concrete cure blanket of Claim 28, wherein the first moisture-impervious outer film is substantially dark in color to absorb ambient heat into the concrete cure blanket.

33. (Previously Presented) The heat reflective concrete cure blanket of claim 28, wherein the second outer film includes a nonstick smooth surface.

34. (Currently Amended) A lightweight multilayer heat reflective concrete cure blanket, comprising:

a first flexible structure comprising a first unslitted moisture-impervious outer film and a first flexible undulating film heat sealed to the first unslitted moisture-impervious outer film forming a first bubble-type insulative layer;

a second flexible structure comprising a second unslitted moisture-impervious outer film and a second flexible undulating film heat sealed to the second unslitted moisture-impervious outer film forming a second bubble-type insulative layer, wherein the second unslitted moisture-impervious outer film includes a plurality of heat reflective elements dispersed throughout the second unslitted moisture-impervious outer film as to reflect heat away from the second flexible structure through a plurality of open spaces between the first bubble-type insulative layer;

the first bubble-type layer comprising a plurality of first insulative pockets and the second bubble-type layer comprising a plurality of second insulative pockets, wherein the first and second insulative pockets alternately face each other forming a the plurality of open spaces; and

the first flexible structure heat sealed to the second flexible structure, wherein the open spaces between the second insulative pockets communicate with the first insulative pockets in a heat transfer path as to form a flexible heat reflective concrete cure blanket.

Serial No. 10/079,192  
Attorney Docket: 6081-005  
Customer No. 29,335

35. (Previously Presented) The lightweight multilayer heat reflective concrete cure blanket of Claim 35, wherein the second bubble-type insulative layer comprises heat reflective elements dispersed throughout the second bubble-type insulative layer.
36. (Previously Presented) The lightweight multilayer heat reflective concrete cure blanket of Claim 35, wherein the second unslitted moisture-impervious outer film is not covered by any material.
37. (Previously Presented) The lightweight multilayer heat reflective concrete cure blanket of Claim 35 further comprising a third flexible structure comprising a third unslitted moisture-impervious film and a second flexible undulating film heat sealed to the third unslitted moisture-impervious film forming a third bubble-type insulative layer, wherein the unslitted moisture-impervious film includes a plurality of heat reflective elements dispersed throughout the third unslitted moisture-impervious film; and, the third flexible structure heat sealed in between the first flexible structure and the second flexible structure.
